It’s easy to switch to 1Password

Protect your team and business with industry-leading security and encryption, designed with the safety and privacy of your data in mind. 1Password leads with transparency and a customer-first approach. With dedicated onboarding and customer success teams on hand, we’re with you on every step of your migration journey, making sure you have a seamless transition to better online security.

Why switch to 1Password Business?

1Password encrypts your vault data in a fundamentally different way

Unlike other password managers, we encrypt your data using a dual-key approach that’s unique to 1Password. Our dual-key encryption keeps your information safe – even a breach of 1Password’s systems would pose no threat to your vault data.

Owned by you, inaccessible to us

Everything we do is engineered to minimize what we know about you and the things you store in 1Password. We never see your account password or Secret Key, and our encryption extends to metadata about your vaults, not just their contents. This ensures that even if someone were to breach our systems, they would obtain nothing but indecipherable gibberish. We can’t disclose what we don’t know, even by accident.

Securing your data at rest and in transit

Secure Remote Password (SRP) protocol allows us to authenticate without sending your keys over the network. This prevents thieves from intercepting them in transit, and protects you from impostors trying to steal your credentials.

You don’t have to take our word for it

Our security model is regularly audited by third-party security experts across the industry, and we offer the largest bug bounty program among password managers to ensure our security model is constantly updated to protect customers against evolving threats.

Our Onboarding and Customer Success teams are ready to help

1Password’s dedicated Onboarding team provides world-class support to each customer, along every step of your migration journey with us. We’re here from your first call and demo, driving additional user adoption, and training, all at no additional cost.

It’s easier than you think to migrate your data from other password managers to 1Password. Our simple migration process and custom script moves and organizes your data quickly so you can be up and running from day one.

During your migration experience, you’ll have access to:

- An **Account Manager** to discuss your unique business needs and create a plan for your business.
- An **Onboarding Specialist** to support a quick and seamless migration to 1Password, while arming you with the resources and training you need.
- A **Customer Success Manager** to assist with employee adoption so your team can get the most out of 1Password.
- **Priority Technical Support** to work through any technical issues or inquiries.

Ready to get started?

Our team will work hand-in-hand with you to understand your unique business needs and help you switch to 1Password Business.
